## THE WATER PATH

Water makes a foundation for each creature living and for the life itself: recovery of sound attitude to water (in its numerous manifestations) is a basis for recovering and creating internal and physical harmony. This thought was a reason why we decided to dedicate quite long passage of this text to this unique elements. Sauna, Turkish Bath or Hammam, Kneipp, Showers with use of sprayed water and Thalassotherapy are consecutive components of ideal way to good mood and relaxation. **Sauna** is a traditional finish method, which together with hammam neutralizes toxin actions, cleans and relaxes. **Hammam** in turn, produces permanent vapour streams, acting intensively and in uniform manner. **Kneipp** thanks to pleasant, changeable flow of hot and cold water improves circulation in lower limbs, shower with use of sprayed water, recommended immediately after hammam or sauna, is a stream of cool, sprayed water, combined with beneficial action of chromotherapy. **Balneo Thalasso** jacuzzi helps in getting rid of stress and tiredness invoked by sitting manner of life, which often accompanies a mad course of work. In the intervals between consecutive treatments and at the end of the way you will be invited to relaxation room for a cup of tea, where you will be accompanied by the sound of quiet music, lying comfortably in your soft deckchair.
